

Ben Bergenwall

Software Developer, Espoo, Finland

github.com/BenBwall

Profile

I've been coding since 2019 and enjoy turning ideas into practical tools. I've built a complete web application for a small business, as well as larger personal projects in Rust, Java and Python.

After completing 130 ECTS in Computer Science, I'm continuing my studies toward a Bachelor of Engineering in Information Technology at Arcada.

Experience

Prevalabs

September 2026 - Present

Junior Software Developer

I work on a web app for clinicians to assess kidney disease risk and follow up with patients. I'm working on both the frontend and backend. We use Next.js for the frontend and Hono with Drizzle for the backend.

Viherkeskinen

January 2026 - Present

Freelance Software Developer

- Built a multilingual, mobile-friendly time-tracking app for a landscaping company, with an admin panel for reviewing reports and managing the system.
- Added passwordless login, user permissions, customizable reports, and synchronization with Google Sheets and Microsoft Excel.
- Developed the app with Next.js, TypeScript, tRPC, Prisma and PostgreSQL, under the technical supervision of Andreas Bergenwall.

Helppy

October - December 2021

Junior Frontend Engineer

Built customer-facing website features and a pricing calculator for a Finnish eldercare startup using TypeScript and Next.js during a ten-week fixed-term role.

Folkhälsan

Spring 2021

Substitute After-School Club Instructor

Supervised children across several after-school clubs, assisted with homework, and received positive feedback for a strong work ethic.
